

## Blended Learning

**Design a future-ready learning environment that blends flexible face-to-face learning experiences with enhanced collaborative online learning.**

As part of Stride's Online Learning Services suite, the Blended solution offers a truly strategic option to solve your district's present challenges. At the same time, while you cultivate the next generation of creative thinkers and collaborators with 21st-century skills for success. Personalize learning for each student with a robust curriculum featuring extensive electives and CTE pathways.

Leverage a blended approach to reduce class sizes by:

- Optimizing online course offerings
- Providing rotating schedules for students
- Utilizing building space flexibly as you blend face-to-face and online
- Making it possible for some students to attend full-time online when necessary

In a blended model, teachers see improved productivity, and students see improved learning outcomes.

### **Blended Is Right for:**

- School districts looking to create a hybrid virtual/in-person model to expand the range of core courses and electives, and increase personalization of learning.
- Districts that want to maximize the flexibility of their facilities, reduce in-person class sizes, and enable teachers to gain more creative time to work one-to-one with students.

## How It Works:

### A Choice of Curriculum

Build your curriculum library with Stride Learning Solutions' comprehensive course catalog, CTE pathways, your own content, or third-party content—all on one platform.

### Access to Integrated Digital Tools

Enrich your online learning environment with Big Universe™, our digital library of more than 20,000 eBooks; Stride Skills Arcade, our rewards-based adaptive learning tool that motivates students to mastery through games; and collaborative tools for CTE that support project-based learning and networking with industry professionals.

### Leverage Stride's Scalable Platform

Easily integrate our digital content and platform into your district's infrastructure. Make it easy to give administrators, teachers, and students a unified view.

### A Choice of Your Teachers or Ours

Help your teachers adapt to online instruction with onboarding assistance and 24/7 live support—or leverage our certified teachers as a short-term or long-term option to fill gaps.

### Researched-Backed Digital Curriculum

- More than 350 courses
  - Core subjects
  - Electives
  - CTE
- Supplemental tools, including the Big Universe digital library and Stride Skills Arcade adaptive learning software
- Aligned to most state standards for Math and ELA
- A built-in customizable daily schedule that allows teachers to track attendance and engagement
- Live virtual collaboration platform built just for education

## Leverage Stride's Modern, Scalable Platform

Stride Learning Solutions makes it easy to integrate our digital content and platform into your district's infrastructure to give administrators, teachers, and students a unified view. Plus, teachers can customize courses and monitor performance.

- SIS and LMS integrations made easy
- Single sign-on (SSO) streamlines management
- Real-time data, analytics, and reports make it easy to monitor learning outcomes
- Integrated online assessments—both computer-scored and teacher-graded—speed placement and help identify learning gaps
- Platforms designed just for K-5 and 6-12

Our client success team is dedicated to helping you identify the right model to maximize digital learning success, and we'll support you through every step of implementation. So if you are new to online or blended learning, you can be confident that Stride Learning Solutions can help your team be successful with the right tools, resources, and training solutions.
