Stride Learning Solutions

Full–Time Online

Build your own full–time online school to retain students now. Serve the diverse needs of more families into the future.

As part of our Online Learning Services suite, the Stride Full-Time Online solution offers districts a way to create a fully virtual school. Expand your reach and retain families and students who desire more scheduling flexibility, greater personalization, or an alternative to the traditional face-to-face classroom setting.

By offering a full-time online option customized for your district, you can meet the diverse needs of families who aren't comfortable sending their children back to a classroom environment in light of the present health crisis or for other personal reasons. Expand your curriculum, digital resources, and instructional options to fill gaps. Add career readiness pathways and personalize learning to help struggling students catch up and advanced students get ahead.

Full–Time Online Is Right for:

- School districts that want to keep staff, students, and parents healthy and safe at home while ensuring education continuity in the event of a crisis.

- Districts that want to support families that desire an alternative learning environment with longer-term access to rigorous curriculum in an online setting.

How It Works:

A Choice of Curriculum

Build your curriculum library with Stride Learning Solutions' comprehensive course catalog, CTE pathways, your own content, or third-party content—all on one platform.

Access to Integrated Digital Tools

Enrich your online learning environment with Big Universe™, our digital library of more than 20,000 eBooks; our rewards-based adaptive learning tool that motivates students to mastery through games; and collaborative tools for CTE that support project-based learning and networking with industry professionals.

Leverage Scalable Platform

Easily integrate our digital content and platform into your district's infrastructure. Make it easy to give administrators, teachers, and students a unified view.

A Choice of Your Teachers or Ours

Help your teachers adapt to online instruction with onboarding assistance and 24/7 live support—or leverage our certified teachers as a short-term or long-term option to fill gaps.

Full Administrative Support

Gain full-time, dedicated implementation planning and support, and teaching for all subjects.
Mobilize marketing to expand reach within your district, enrollment and program management services, and professional development for teachers and parents.

Researched-Backed Digital Curriculum

- More than 350 courses
  - Core subjects
  - Electives
  - CTE

- Supplemental tools, including the Big Universe digital library and Stride Skills Arcade adaptive learning software

- Aligned to most state standards for Math and ELA

- A built-in customizable daily schedule that allows teachers to track attendance and engagement

- A virtual collaboration platform built just for education

Stride Learning Solutions

Leverage Stride's Modern, Scalable Platform

We make it easy to integrate our digital content and platform into your district's infrastructure to give administrators, teachers, and students a unified view. Plus, teachers can customize courses and monitor performance.

- SIS and LMS integrations made easy
- Single sign-on (SSO) streamlines management
- Real-time data, analytics, and reports make it easy to monitor learning outcomes
- Integrated online assessments—both computer-scored and teacher-graded that speed placement and help identify learning gaps
- Platforms designed just for K–5 and 6–12

Our client success team is dedicated to helping you identify the right model to maximize digital learning success, and we'll support you through every step of implementation. So if you are new to online or blended learning, you can be confident that Stride Learning Solutions can help your team be successful with the right tools, resources, and training solutions.

Discover the Online Learning Service that's right for you.
